Cabin design.

Make Your Lift Unique!

Galaxy laminate.

Take a lift to the stars!

The Galaxy may belong to Axess 2's basic line, however it offers unbelievable combinations. Thanks to a system of multiple standardized options, we have the opportunity to differentiate according to our customers' needs.
A wide range of different colored laminates and designs, inox corners, floors, false ceilings and handrails, compose top class cabins.

Galaxy Glass.

Reflecting elegance.

The Galaxy Glass cabin is designed to integrate into different architectural tensions.
Glass increases the sensation of luminosity ensuring the harmony with the architectural style. It updates the aesthetic appeal making e attractive, functional and safe.

Axess 2 offers the highest quality of materials providing a wide variety of different colored glasses to choose from, in order to ensure that your individual requirements will be reflected to the final product.

Inox.

Classic is the new modern!

The industrial style finds its ultimate expression in the Inox series.
A wide range of finishing and false ceilings made entirely of brushed stainless steel or mirror - for a more impressive result - and carefully selected floors and handrails, compose high aesthetical and robust cabins.
At the same time and in order to underline how important Axess 2 considers every detail, we offer the opportunity to construct corners - either the classic straight form or the curved - and the use of special or patterned inox finishing.

Inox myCOLOR.

Put color in your space!

The industrial style comes in perfect combination with our groundbreaking series Inox myColor, the updated version of the Inox series.

The new trends want to soften the “strictness” of the Inox with different shades, and Axess 2 as an innovative company, manufactures trendy and elegant cabins which highlight their absolute modern design by creating a pleasant mood. Therefore, they are being chosen by young couples, civil engineers and architects who emphasize on design and atmosphere at home or in the office.

Epoxy.

Low cost but not shabby!

Simplicity meets functionality in the Epoxy series.
Powder coated* ceilings and side walls in high quality and durability, modern spot lights on the ceilings and durable plastic floors, make up the affordable solution for many years of daily elevation, without compromises!

Epoxy myREFLECTION.

Make it personal!

The advanced generation of the Epoxy line is the new series, Epoxy myReflection. Axess 2 offers the option of a digital printing in the interior of the cabin according to the desired image of the client and his personal style, or a slogan/logo for companies. Furthermore we can offer a library with a wide selection of images.

Forest.

Travel... naturally!

For the wood lovers, we created the Forest series.
The perfect combination of horizontal wood panels with stainless steel details, high quality floors and artificial granites, creates a warm and intimate composition.
The cabins of the Forest series are ideal for residences and hotels.

Prestige.

Worth every inch!

The sophisticated elegance is reflected in the prestige series.
The variety in materials, false ceilings, handrails, floors and mirrors in unlimited combinations, create high class cabins, distinguished for their absolute design and luxury.

Fully Automatic Sliding Car & Landing Doors

Specifications

- Low noise, reliable & smooth operation using VVVF driven motor
- Option for automatic emergency operation
- Wide variety of choices depending on the needs of your building
- Finished in various stainless steel patterns or epoxy paint
- Glass panels with or without stainless steel frame
- Round shaped
- Easy installation
- Wide span of life with minimum maintenance
- Door locks certified according EN81 regulations
- Fire rated if required (E-120, EI-60)

Automatic Folding Car Doors

AUTOMATIC FOLDING CAR DOORS

The automatic folding car door is the ideal solution for lifts with swing opening landing doors.
The main advantage is the small shaft width required.

Swing Opening (Semi - automatic) Landing Doors

Selected as a cost effective solution for both passenger and goods lifts. Entrance clearances vary from 600mm to 3.000mm, single panel or two-panels, satisfying a wide range of applications.

Distinguished for:

- Stiff and reliable structure
- Wide range of paints and finishes
- Easy installation and maintenance
